

Free Electronic Waste [E-Waste] Collection Event

Help our City get rid of E-Waste the right way by sending it to a proper recycling process and not into the landfills!

- Electronic discard is one of the fastest growing segments of this nation's waste stream.
- 56% of American households have functional e-products that they no longer use.
- 70% of heavy metals, 40% of lead and mercury contents found in today's landfills come from E-Waste.
- February 17, 2009, new federal mandate requires that television stations switch from analog format to digital format, which means a greater turn-over on televisions within the next several years.
